*"Protecting the
Equestrian Athlete"*

SinoBlue.com

INTRODUCTION

OUR STORY

CONTENTS

INNOVATION DRIVEN DESIGN

SinoBlue entered the equestrian business from the manufacturing side through quality control, toolmaking and design in Taiwan.

SinoBlue is at the center of Taiwan’s design and manufacturing hub for the world’s leading sports equipment companies. SinoBlue leverages this domain knowledge, especially for tooling, to create our original equestrian leg protection designs, girths and other items as well as our customers’ OEM designs.

In addition to leg protection, we also help design and manufacture crops and whips, hardware, stable supplies, webbing items, neoprene items as well as livestock and human use items.

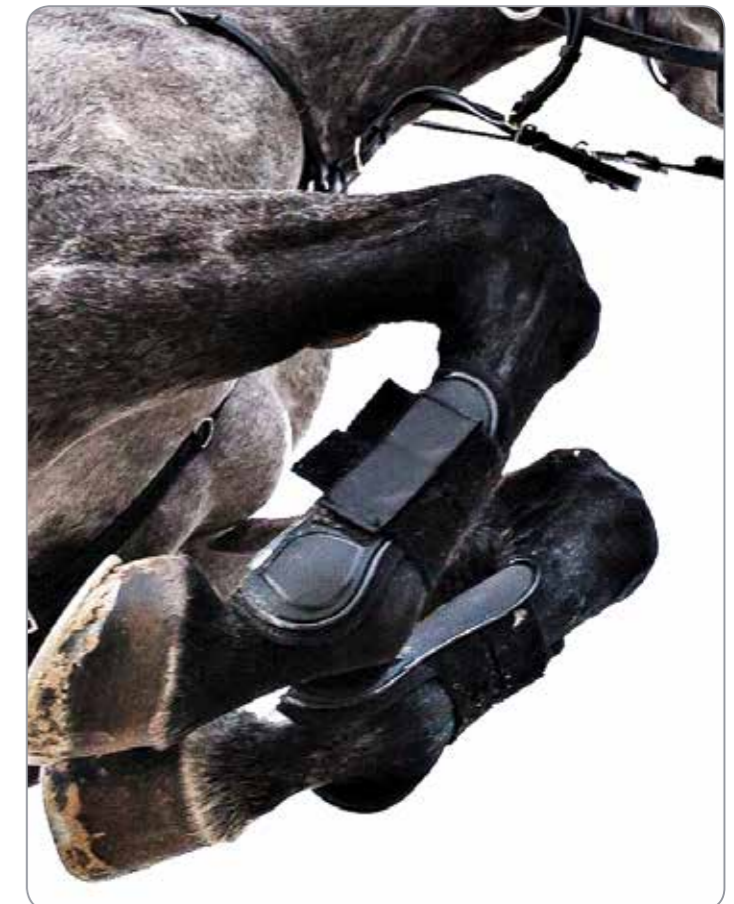

Product Design Support

SinoBlue works together with customers to design and manufacture new products. This process might start as a concept or idea, proceed to sketches, 2D/3D drawings, tooling creation, prototype creation and testing, and proceed all the way to production and packaging.

We design for the horse as if it were a top world class human athlete. Most of our product designs utilize Green manufacturing and materials for environmental compliance for RoHS and REACH (no PVC, less glue).

PRO MESH SERIES

SinoBlue's "Pro Mesh" Innovation

SinoBlue invented Pro Mesh engineered material for use in a series of equine applications. Pro Mesh material not only acts like 'flexible horse armor' but also offers an ultimate combination of breathability/cooling, impact and abrasion protection, support and flexibility in a totally waterproof design and RoHS/REACH environmentally Green materials .

Pro Mesh Advantages

- ✓ **Protects, Supports, Flexible**
- ✓ **Breathable** - Great ventilation, stops sand and dirt from passing through.
- ✓ **Lightweight** - Hexagonal holes are nature's perfect strength-to-weight design.
- ✓ **Water Resistant**
- ✓ **Strong, Tough and Tear Resistant**
- ✓ **Customized/OEM Design Support**

Pro Mesh Defined

Invented by SinoBlue, Pro Mesh material is RoHS/REACH compliant German quality BASF® TPU directly injected into a strong but breathable fabric mesh. Pro Mesh is created during the injection molding process under high heat and pressure. No glues or adhesives are used. Synergy was attained resulting in a strong composite material that protects from impacts and abrasion, will not separate, is extremely durable, totally breathable, will not let sand and dirt pass through, is waterproof and provides great flexibility .

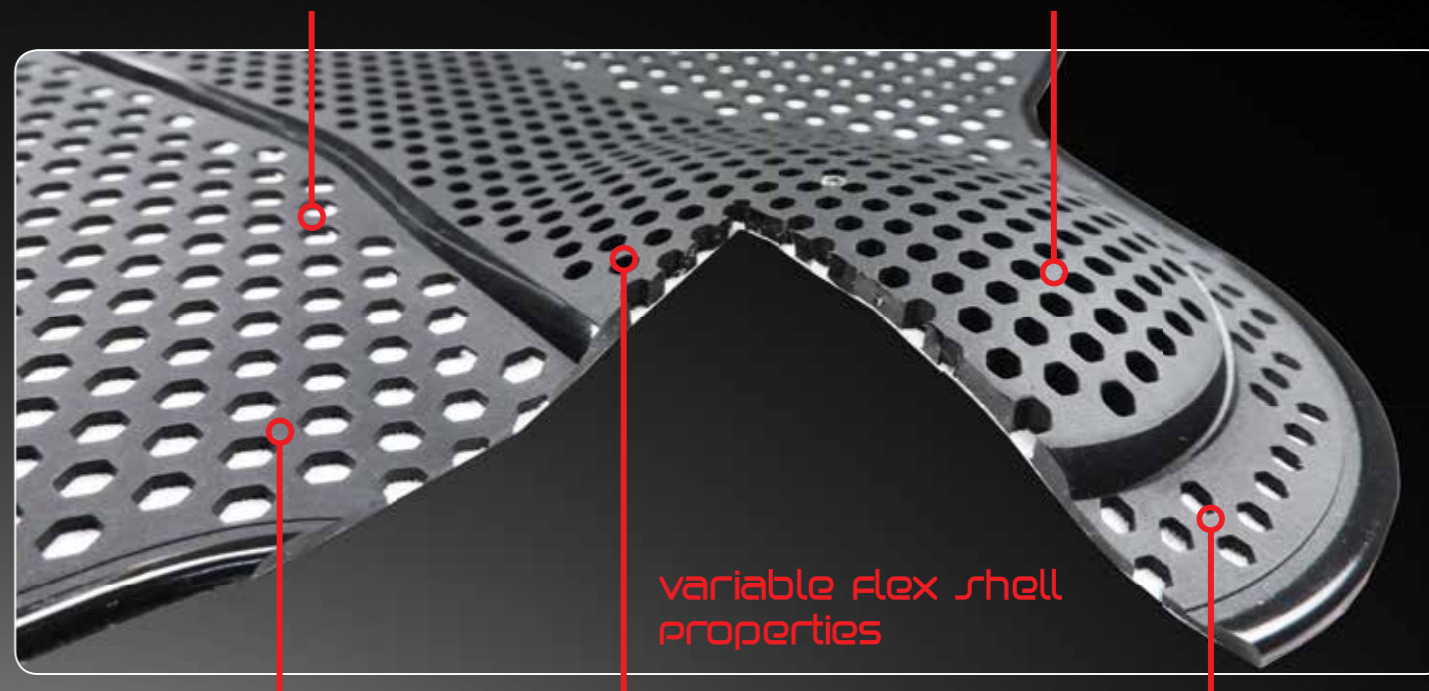

generation 3

PRO MESH SERIES

Pro Mesh Generation 3 Composite Design

TPU Injected Directly into the Threads of a Strong, Breathable Fabric Mesh for a Permanent Mechanical Bond. No Glues or Adhesives Used

Can be Shaped and Formed

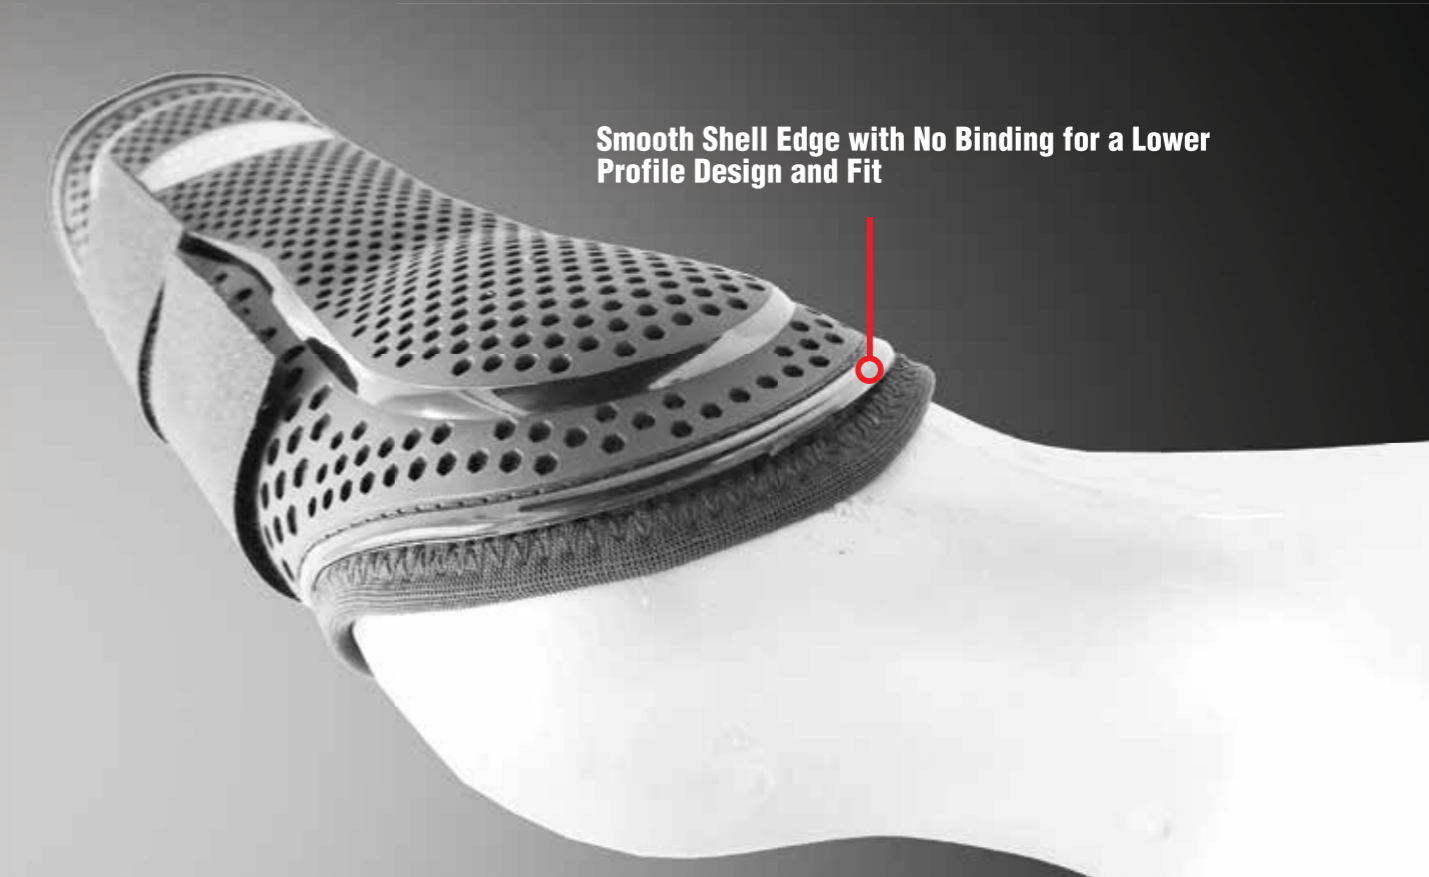

Larger Holes for Better Stretch, Flexibility and Air Flow

Smaller Holes and Thicker Material for Improved Impact Protection

Medium Hole Size For Normal Flexibility

variable flex shell properties

Smooth Shell Edge with No Binding for a Lower Profile Design and Fit

PRO MESH SERIES

generation 3

SINOBLUE

PRO MESH SERIES

variable flex Dressage/Splint/Brushing Boot

Pro Mesh G3 Dressage/Splint/Brushing Boots offer versatile leg protection. Pro Mesh composite material offers 360° protection and air flow for cooling legs. Waterproof materials and non-slip lining make the boots great for wet conditions. The hypoallergenic lining is ideal for horses with sensitive skin. Green Design means all materials are documented RoHS/REACH compliant. Ideal for dressage, turnout, trail, endurance riding, flatwork training and other general brushing protection needs.

Dressage/Splint/Brushing Boot variable flex

- XC2 Boot Hind White SB63217 WHT
- Sizes: S, M, L
- Colors: (For Pro Mesh Outer Layer): Black, White. Other colors by request. We can match any Pantone color.

Cross Country Hind Boot pro mesh GI

Specially designed Pebax® strike guard on the inside of the boot. Pebax is lightweight and will not shatter and splinter like many hard plastics and carbon fiber can.

AIR SHOCK SERIES

air shock Open Front Tendon Boot

Jump boots feature “Air Shock” cushioning made of pressurized gas in a tough and flexible TPU bag. The air bag works together with the harder, specially shaped strike guard to reduce concussion force. The air bag then returns to its original shape and volume. The air bags also help enhance boot fit. The air cushions are lightweight, durable and last the life of the boot.

Dual Hardness Shell is Harder in Critical Areas, More Flexible in Others.

Air Shock Technology

- ✓ Advanced Concussion and Impact Protection
- ✓ Air Bag Provides Great Comfort and Better Fit
- ✓ Works together with the Specially Shaped Strike Guard
- ✓ Similar Technology used in Professional Football Helmets

- Air Shock Open Front Tendon Boot
- Air Shock Open Front Hind Boot
- Air Shock Fetlock Boot

PRO MESH SERIES

variable flex Dressage/Splint/Brushing Boot

Pro Mesh G3 Variable Flex Dressage/Splint/Brushing Boots offer versatile leg protection designed for the equestrian athlete. Variable Flex Pro Mesh composite material offers plus 360° protection and air flow for cooling legs. Waterproof materials and non-slip lining make the boots great for wet conditions. The hypoallergenic lining is ideal for horses with sensitive skin. Green Design means all materials are documented RoHS/REACH compliant. Ideal for dressage, turnout, trail, endurance riding, flatwork training and other general brushing protection needs.
